Hi Patrick,

I know you may not be able to comment on the air permit for Medrecycler as it's in mediation. Are you able to confirm whether Monarch Waste Technologies, the comparison site in Santa Fe, New Mexico, is still in operation? My understanding is it is not. Let me know.

Best Regards,
Denise Lopez

Hi Pat,

Thank you . One additional concern that was raised was whether any consideration had been given to an Air Toxics Permit in addition to the Minor Air Source Permit for the Medrecycler project based on the following (page 15 of DEM Air Toxics doc below) ...

V. Prioritization of Sources for Requiring Air Toxics Operating Permits

2. Consideration of other factors may shift a source to a higher priority position. Such factors include, but are not limited to:
 - Neighborhood concern about odors and/or health impacts
 - Proximity of the source to other sources emitting air toxics
 - Proximity of the source to residential areas, schools, or other sensitive receptors
 - Uncertainty about emissions calculations
 - Elevated short-term emissions of a substance with a one-hour or 24-hour AAL

Hi Denise,

It has been some time since my group has fielded questions on this proposed facility. However, I am coordinating with our solid waste group and with Rhode Island DEM to determine the status of the project.

I will follow up with you shortly.

Good Evening Mr Bird,

I wanted to follow up on our conversations from last year as concerns among the community are continuing to grow as the public comment for the solid waste permit with DEM is coming up on Monday, 3/15. Has your area provided any additional oversight on the application since last year?

Thanks in advance for any information you can provide.

Best Regards,

Denise Lopez

Hi Denise,

I certainly don't want you to feel like we're giving you the runaround. But much of the opportunity for public participation will occur at the state level. To date, no permits have been proposed for this facility, and the state is still evaluating applications. I encourage you to reach out to the state contacts and learn where they are in their review process.

Thank you . The irony is RI DEM is actually the one who told me to reach out to you .

Thank you for the additional parties to reach out to . I just hope that someone is taking this seriously and not just sending me from one place to another with no answers .

Best ,

Denise Lopez

Ms. Lopez,

We appreciate you reaching out to us regarding the Medrecycler facility proposed to be constructed in West Warwick, Rhode Island. We have been coordinating with the Rhode Island Department of Environmental Management (RI DEM) about this proposed facility. RI DEM is reviewing the proposed facility with respect to all applicable state air quality, solid waste, and wastewater regulations, as well as delegated federal regulations. We are working with RI DEM in reviewing applicable requirements that apply to the proposed facility.

RI DEM has the primary responsibility to issue any air quality, solid waste, and wastewater permits required for this operation. We encourage you to contact RI DEM directly regarding your questions about permitting approvals that are required and opportunities for the public to provide input. The contact at RI DEM for air questions is Ruth Gold at 401-222-2808 extension 7110 or ruth.gold@dem.ri.gov, the contact for solid waste questions is Mark Dennen, at 401-222-2797 extension 7112 or mark.dennen@dem.ri.gov, and the contact for wastewater questions is Nicholas Pisani at 401-222-4700 extension 7423 or nicholas.pisani@dem.ri.gov.

In addition to state regulatory requirements, we encourage you to contact the local planning board and other local offices regarding their requirements and opportunities for public input at the local level. Please contact Mark Carruolo at 401-827-9025 in West Warwick for questions about requirements at the local level.

Subject: Re: Public concerns regarding location MED RECYCLER
Facility being proposed for 1600 Division Road, West Warwick

Thank you . As you can see from the aerial pic below , although the facility is technically being proposed for West Warwick it is right on the EG line near residential areas , New England Tech as well as a day care .

There are many concerns including..

- How close should this be to a preschool / daycare and residential homes (see aerial view below)? Although technically in West Warwick is right on EG line near residential area as well as abutting Coventry , West Warwick

.

- are there requirements for filters on any air stacks ?

- how is this plant cleaned and how often ?

- wastewater concerns as this property is on a pond and in a well water area

.

- will this be regulated by the Clean Air Act ?
- there has been NO safety planning committee produced and even the R.I. DEM seemed concerned with little to no testing being done on such experimental technology.

Thank you again and look forward to hearing from you .

Best Regards ,

Denise Lopez

"A relatively untested technology that cooks medical waste to generate electricity is proposed for a local office and warehouse building."

<https://www.ecori.org/renewable-energy/2020/2/23/ck9nv4mw8075yzsrdvy2tb3ep2xe5?fbclid=IwAR38milruzHw0rdYR161WSm3jaaBWoe2pl7G4ywMy21Kkx076mpgqMji0-A>

" The Conservation Law Foundation (CLF) has noted that emissions from pyrolysis contain cancer-causing compounds. The ash consists of dioxins, mercury, and heavy metals — pollutants that can make their way into waterways and drinking water supplies. The applications submitted to DEM says the facility will emit or have as byproducts carbon dioxide, carbon monoxide, silicon dioxide, magnesium oxide, iron oxide, sodium chloride, and sodium sulfide"

As an East Greenwich resident this is NOT something I want close to my home .

I am writing to register my concern regarding the permit approval for the proposed Med Recycler site for 1600 Division Rd. This facility is very close to the residential area where I live , Signal Ridge, as well as many of the homes here are on well water. In fact, I have already seen that the "MED RECYCLER" name has been added to the 1600 Division Rd sign which seems a bit premature.

The petition below further elaborates community concerns as in less than 2 days it has gotten 600 signatures (and counting) representing how alarmed the community is with this project. It was also request that West Warwick and Coventry residents be added as they also have issue with the facility in a residential community.

<https://www.change.org/p/west-warwick-town-council-stop-proposed-med-recycler-site-for-1600-division-rd-approval/u/25946141>

I would like additional information on where this stands with EPA approval and when the public will be able to weigh in with their concerns regarding the location.

Thank in advance for your consideration. I look forward to hearing from you .

Denise Lopez
